Overview

A multi-tenant SaaS platform that lets independent travel advisors and boutique agencies launch polished, Virtuoso-grade websites without a developer. The operator controls the shared supplier database; each advisor gets a branded public site, a self-service portal, and a Stripe billing relationship.

Operator / Admin

`/admin`

- Supplier database (hotels, cruises, villas)
- Advisor roster & subscriptions
- Blog pipeline & categories
- Consultation & edit requests

Advisor Portal

`/agent-portal`

- Profile, site settings, branding
- Blog (Tiptap editor)
- Lead inbox
- Stripe billing portal

Public Advisor Sites

`/frontend · /t2 · /t3 · /t4`

- Rendered in 1 of 4 templates
- Served on custom domain via middleware rewrite
- Shared modules stack by tier

End-to-End SaaS Lifecycle

Seven stages from first touch to renewal. Status chips reflect the current state of the code (Built / Partial / Missing).

1 **DISCOVER** — Built
Marketing site, pricing, demos

2 **QUALIFY** — Built
Checkout or consult form

3 **PAY** — Built
Stripe checkout + webhook

4 **ONBOARD** — Built
5-step wizard

5 **PROVISION** — Partial
Manual site build (24–48h)

6 **OPERATE** — Built
Blog, leads, profile

7 **RENEW / CHURN** — Partial
Stripe portal; no retention flows

Who does what at each stage

PROSPECT

Lands on eliteadvisorhub.com
home, demos, pricing
›
Picks a tier
or books a call
›
Enters Stripe checkout
or consult form

SYSTEM

Stripe creates subscription
+ setup fee line item
›
Webhook creates agent row
tier, stripe_customer_id
›
Resend: welcome + admin alert
lib/email.ts
›
Redirect to /onboarding
with session_id

ADVISOR

Completes 5-step wizard
info → branding → bio → social → review
›
Waits for site provisioning
currently manual
›
Publishes blog posts / edits profile
Tiptap + forms
›
Responds to inbound leads
/agent-portal/requests

OPERATOR	Sees signup notification (admin_notifications) › Provisions template & domain (assigns agentId, custom_domain) › Curates supplier data (hotels, cruises, promos) › Reviews edit requests (/admin/requests)

1 · Acquisition

Top of funnel: the marketing site itself, plus the demos that let prospects see the product in action.

TOUCHPOINT	PATH	PURPOSE	STATUS
Marketing home	/	Hero, value prop, demo cards, pricing, CTA	Built
Demo sites	`/frontend/demo-agent` · `/t2/t2-demo` · `/t3/t3-demo` · `/t4/casa-solis`	Live examples of each template tier	Built
Pricing section	`/#pricing`	4 tiers with setup fees & feature lists	Built
Schedule consultation	`/schedule-consultation`	Form for Custom / Agency leads	Built
SEO	`/robots.ts` · `/sitemap.ts`	Excludes /admin, /agent-portal, /api	Built
Paid/organic funnels	–	Ad landing pages, referral program, affiliate tracking	Missing
Analytics wiring	–	GA4/Plausible events on checkout start/complete	Missing

2 · Sign-up & Billing

Stripe-backed self-serve for Starter/Growth/Custom. Agency is manual quote.

Pricing CTA › /api/stripe/checkout › Stripe Checkout (hosted) › checkout.session.completed webhook › Supabase agents row › Resend welcome email › /agent-portal/onboarding

COMPONENT	FILE	STATUS
Checkout session creation	`app/api/stripe/checkout/route.ts`	Built

Webhook handler	`app/api/stripe/webhook/route.ts`	Built
Tier → price ID map	`lib/stripe.ts (TIER_PRICES)`	Built
Customer portal link	`app/api/stripe/portal/route.ts`	Built
Agency self-serve	`TODO — empty price slot`	Missing
Dunning / failed payment	`webhook ignores invoice.payment_failed`	Missing
Trial / money-back	`Not configured`	Missing
Tax (Stripe Tax / VAT)	`Not configured`	Missing

3 · Advisor Onboarding

Five-step wizard after checkout. Captures everything needed to publish the advisor's site.

1 · Your Info › 2 · Branding & Template › 3 · About You › 4 · Social & Contact › 5 · Review & Submit

▼ **Step-by-step fields captured**

Step 1 — Your Info: full_name, agency_name, phone, avatar upload
Step 2 — Branding: tagline, template choice (`frontend` Starter · `t2` Vista · `t3` Meridian · `t4` Casa Solis)
Step 3 — About You: bio, destination specialties, travel-type specialties, supplier affinities
Step 4 — Social: Instagram, Facebook, LinkedIn, YouTube URLs, Virtuoso / host agency affiliation
Step 5 — Review: confirms & sets `onboarding_completed_at` on the agents row

> **Gap:** Site provisioning is manual after submission — operator assigns an `agentId` slug, seeds the template, wires a custom domain, and picks featured suppliers. Auto-provisioning a working site immediately after wizard submit is the single biggest lift to remove humans from the loop.

4 · Tier Matrix

Four packages. Tiers stack — upgrading adds modules, never rebuilds.

Starter

$79/mo

+ setup fee

Solo advisor getting online

- 9 required routes

Growth

$149/mo

+ setup fee

Established advisor scaling leads

- 10 required + 1 optional (villa)

- Curated hotel & cruise grids
- Brand pages (M09/M10)
- Journal + contact
- Template: `frontend`

- Searchable directories
- Experiences module
- Template: `t2` or `t3`

Custom

$299/mo

+ bespoke setup

Advisor wanting tailored design

- Growth feature set
- Custom layout & branding
- Template: any (incl. `t4`)
- Off-platform design call

Agency

Custom · quote

Manual sales flow

Multi-advisor agency

- 12 required + 1 optional
- Advisor directory Missing
- Lead routing by advisor Missing
- Template: typically `t2`

5 · The Three Product Surfaces

Every feature lives in one of these three apps.

Admin console · /admin

ROUTE	WHAT IT DOES	STATUS
`/admin`	Dashboard: signups, pending requests, notifications	Built
`/admin/agents`	List & detail for every advisor (profile + Stripe)	Built
`/admin/blog · /categories`	Global blog CRUD & taxonomy	Built
`/admin/consultations`	Custom/Agency leads from /schedule-consultation	Built
`/admin/requests`	Edit requests from advisors (triage queue)	Built
`/admin/suppliers/*`	Hotel / cruise / villa catalog management UI	Partial — data exists, some UI via direct Supabase

Advisor portal · /agent-portal

ROUTE	WHAT IT DOES	STATUS

/agent-portal	Stats dashboard & quick links	Built
/agent-portal/onboarding	5-step wizard	Built
/agent-portal/profile	Edit bio, headshot, specialties	Built
/agent-portal/site-settings	Tagline, domain, socials	Built
/agent-portal/blog · /blog-settings	Tiptap editor + category preferences	Built
/agent-portal/requests	Lead inbox (inquiries + edit requests)	Built
/agent-portal/billing	Jump to Stripe customer portal	Built

Public advisor sites · /frontend · /t2 · /t3 · /t4

Per-template route shapes (the Feature Matrix drives which are required).

ROUTE	STARTER	GROWTH	CUSTOM	AGENCY
/	✓	✓	✓	✓
/about · /contact · /plan-a-trip	✓	✓	✓	✓
/book-hotel (curated grid)	✓	—	—	—
/book-hotel (searchable)	—	✓	✓	✓
/find-cruise	curated	searchable	searchable	searchable
/experiences	—	✓	✓	✓
/book-villa	—	optional	optional	optional
/journal + /journal/[slug]	✓	✓	✓	✓
/advisors · /advisors/[slug]	—	—	—	✓ Missing

6 · Templates & Modules

Every template composes the same canonical section order — tier-locked modules just drop out. Core modules (M05, M06, M07, M09, M10, M18, M20) appear on every tier.

Frontend (Starter) editorial

Simple layout, type-forward, lightweight

- Home hero · Services cards · Hotel programs teaser
- Journal teaser · Contact

t2 "Vista" (Growth/Custom) ~30 components

Cinematic widescreen — inspired by Virtuoso editorials

- T2Hero · T2PartnerTabs · T2HotelCard · T2FindCruise
- T2Experiences · T2InstagramFeed · T2Testimonials

- About, Resources, Media

- T2Advisors (agency) · T2PromoBanner · T2Enquiry

t3 "Meridian" (Growth/Custom) ~20 components

Modern sans-serif, grid-driven

- T3Hero · T3ServiceCards Missing
- T3HotelGrid · T3CruiseGrid · T3Journal
- T3Contact · T3PlanATrip

t4 "Casa Solis" (Custom flagship) ~15 components

Quiet-luxury atelier aesthetic

- T4Hero · T4Atelier · T4Press
- T4Portfolio · T4Contact

Shared components (called by every template)

COMPONENT	PRIORITY	STATUS	BLOCKER FOR
T3ServiceCards	P1	Missing	Starter home on t3
HotelProgramsGrid — t2 curated variant	P1	Missing	t2-based Starter demos
CruisePartnersGrid — t2 curated variant	P1	Missing	Same
JournalTeaser (t2 + t3)	P2	Partial	Every tier's home
InstagramFeed (t2 + t3)	P2	Partial	Growth+ homes
TestimonialsGrid (t2 + t3)	P2	Partial	Social proof across tiers
AdvisorsDirectory (t2 + t3)	P3	Missing	Agency tier
/advisors + /advisors/[slug] routes	P3	Missing	Agency tier
Lead routing by advisor	P3	Missing	Agency tier

7 · Publishing Pipeline

How a change in the advisor portal reaches the live site.

Advisor edits in portal › Supabase UPDATE › Public route SSR fetch › Visitor sees change

PIPELINE PIECE	HOW IT WORKS TODAY	STATUS
SSR rendering	App Router, server components fetch from Supabase on each request	Built
Static params	`generateStaticParams` for brand pages & cruise slugs	Built
Custom domain routing	`middleware.ts` rewrites `agency.com` → `/t2/[agentId]` with 5-min cache	Built

On-demand revalidation	No `revalidatePath()` calls — blog edits wait for next build or SSR miss	Missing
Image optimization	next/image with remotePatterns; mirror script for hotel covers	Built
Missing hotel covers	`hotels-missing-covers.csv`, `missing_hotel_images.csv` — backlog	Partial

8 · Data Model

28 Supabase migrations. Core tables below; RLS is in place but not audited per-table.

TABLE	PURPOSE	OWNER
`agents`	Advisor account (tier, stripe IDs, template, custom_domain, bio, onboarding_completed_at, role)	System + self
`blog_posts · blog_categories`	Published content + taxonomy	Advisor + admin
`agent_blog_preferences`	Which categories each advisor shows	Advisor
`hotel_programs · featured_hotels · collections`	Virtuoso/Aman/Belmond/etc. perk catalogs	Admin (global)
`agent_hotel_program_selections`	Per-advisor supplier affinities	Advisor
`cruise_lines · villas`	Cruise & villa catalogs	Admin (global)
`supplier_tags · supplier_promos`	Filtering & promotional overlays	Admin
`inquiries`	Contact-form leads per advisor	Public → Advisor
`consultation_requests`	Custom/Agency sales leads	Public → Admin
`edit_requests`	Advisor asks admin for a change	Advisor → Admin
`admin_notifications`	Signup, cancellation, onboarding events	System

9 · Integrations

SERVICE	ROLE	FILE / SURFACE	STATUS

Stripe	Subscription billing, setup fees, customer portal	`lib/stripe.ts` · `/api/stripe/*`	Built
Supabase	Auth (magic-link OTP), Postgres, storage	`lib/supabase/*`	Built
Resend	Transactional: welcome, admin notifications	`lib/email.ts`	Built
Sanity	Alternate CMS — scaffolded but deprioritized	`lib/sanity/*`	Partial — decide in or out
Tiptap	Blog rich-text editor	`@tiptap/* in portal`	Built
Instagram	Feed embed on homes	`components/instagram`	Partial
YouTube	Video embeds / playlists	`lib/youtube.ts`	Built
Vercel	Hosting, custom domains, image CDN	–	Built
Analytics	Funnel + product analytics (GA4 / PostHog / Plausible)	–	Missing
Support / help	Intercom / Crisp / docs site	–	Missing

10 · Ongoing Use (post-launch)

What an advisor actually does week to week once their site is live.

JOBS-TO-BE-DONE	WHERE	NOTES
Publish a journal entry	`/agent-portal/blog`	Tiptap editor, cover image, categories — admin approval optional
Respond to an inquiry	`/agent-portal/requests`	Inbox; no reply composer yet — advisor emails out of band
Update bio / headshot	`/agent-portal/profile`	Immediately reflected on public site (SSR)
Request a site change	`Submit edit request`	Admin triages in /admin/requests
Upgrade tier	`Contact admin`	No self-serve tier upgrade in app yet
Swap featured hotels	`agent_hotel_program_selections`	Wiring exists; UI for advisor selection is Partial

Change custom domain	`/agent-portal/site-settings`	Domain verification & Vercel attachment is manual

11 · Renewal, Expansion, Churn

EVENT	TODAY	STATUS
Monthly renewal	Stripe auto-renews; no email confirmation	Partial
Failed payment	Webhook doesn't act on invoice.payment_failed	Missing — dunning
Tier upgrade	Manual — contact admin	Missing — self-serve
Tier downgrade	Customer portal only	Partial
Cancel	Stripe portal → subscription.deleted webhook → agents row flagged	Built
Offboarding	Site stays up until admin disables — no data export	Missing
Win-back / pause	No flow	Missing

12 · Pre-Launch Gap Dashboard

What needs to be true before you can open the door to paying customers outside your own network.

38	9
BUILT	PARTIAL
14	**61**
MISSING	TOTAL AUDITED

Must-haves before launch (P1)

- [ ] **Build T3ServiceCards** — P1 — Missing
  Starter home on t3 cannot render without M03; blocks any t3 Starter demo.
- [ ] **Build t2 curated HotelProgramsGrid & CruisePartnersGrid** — P1 — Missing
  Required for a t2-based Starter path; otherwise Starter is locked to the frontend template.

- [ ] **On-demand revalidation (revalidatePath)** — P1 — Missing
  Today a blog or profile edit waits for a full rebuild or SSR miss. Advisors will notice staleness immediately.

- [ ] **Dunning on invoice.payment_failed** — P1 — Missing
  No email + no grace period today — a failed card silently disables the subscription on Stripe's default timeline.

- [ ] **Auto-provisioning after onboarding** — P1 — Partial
  Manual 24–48h site build works while volume is low. If two advisors sign up the same day you hit a bottleneck.

- [ ] **Analytics on signup funnel** — P1 — Missing
  You can't optimize /schedule-consultation → checkout → onboarding without GA4 / PostHog events.

Should-haves (P2)

- [ ] **Shared JournalTeaser, InstagramFeed, TestimonialsGrid (t2 + t3)** — P2 — Partial
  All three are listed as required on every tier's home.

- [ ] **Domain verification & auto-attach (Vercel)** — P2 — Missing
  Today, custom domain is wired manually. Even a small self-serve wizard closes the last non-automated gap.

- [ ] **Reply composer in the lead inbox** — P2 — Missing
  Advisors currently copy/paste into their mail client; a "Reply" button with templates is a clear quality-of-life win.

- [ ] **Self-serve tier upgrade** — P2 — Missing
  Currently a manual admin flow; a Stripe prorated upgrade is straightforward and drives revenue.

- [ ] **Decide Sanity in or out** — P2 — Partial
  ~7k references to Sanity but no active integration. Either activate it for long-form content or remove it.

- [ ] **Stripe Tax / VAT handling** — P2 — Missing
  Required for EU/UK advisors and any US multi-state billing.

- [ ] **Password reset / recovery** — P2 — Missing
  Magic-link auth works, but when an advisor loses access to their email you have no secondary flow.

Nice-to-haves & post-launch (P3)

- [ ] **AdvisorsDirectory component + /advisors routes** — P3 — Missing
  Unlocks the Agency tier. Not needed for v1 if Agency is still sold manually.

- [ ] **Lead routing by advisor** — P3 — Missing
  Agency tier core feature — inquiries from an agency site need to land with the right advisor.

- [ ] **Agency self-serve pricing** — P3 — Missing
  TIER_PRICES has an empty Agency slot; fine to leave as manual quote for v1.

- [ ] **Advisor self-service supplier selection UI** — P3 — Partial
  Table exists; the admin-side wiring works. Advisor UI would let them curate their own featured hotels.

- [ ] **Data export on offboarding** — P3 — Missing
  When an advisor cancels, they should be able to export their blog posts + leads before their site is disabled.

- [ ] **Missing hotel covers backlog** — P3 — Partial
  Two CSVs (`hotels-missing-covers.csv`, `missing_hotel_images.csv`) track what still needs imagery.

- [ ] **Help center / advisor docs** — P3 — Missing
  Keeps support burden flat as volume grows.

Suggested launch cut line: everything in P1 + the two P2 items that touch money (domain auto-attach, Stripe Tax) and the reply composer. P3 can ship after first 5–10 paying advisors, driven by whichever gap they hit first.
